The Bio-PRF Bone Grafts

EXTRACT-OSS

- A more potent version can be obtained from a 75/25 mineralized/demineralized formulation. The 25% demineralized freeze-dried bone allograft (DFDBA) allows for faster release of BMPs from within the graft while maintaining dimensional ridge stability owing to its 75% composition of mineralized freeze-dried bone allograft (FDBA).

Item	Size	Box of 10 or more	Total Quantity of Orders	Total Cost of Orders

The Bio-PRF Bone Grafts

PERIO-OSS

- This graft is composed entirely of 100% pure demineralized freeze-dried bone allograft (DFDBA). This favors faster regeneration of the periodontal ligament, with cementum and bone regeneration attached via Sharpey's fibers.

Item	Size	Box of 10 or more	Total Quantity of Orders	Total Cost of Orders
Perio-Oss	0.5CC	\$74 <input type="checkbox"/>		
Perio-Oss	1CC	\$94 <input type="checkbox"/>
